

Description

You are an experienced PhD candidate or postdoctoral researcher in the field of artificial intelligence looking for a new experience? You want to connect with leading research groups and research institutions from Germany?

The **DAAD's Postdoctoral Networking Tour in Artificial Intelligence** is your opportunity to get a unique insight into the German AI research landscape. During the one-week virtual tour, you will connect directly to leading researchers. Additionally, you will also be supported for **customized on-site-visits** as soon as COVID-19 restrictions allow to do so.

The virtual tour with a focus on **Data Science and Artificial Intelligence** will take place from **26 to 30 April 2021**.

Conditions

You should have:

- a very strong scientific track record with a focus on artificial intelligence and machine learning (preferably connected to the research areas of the tour's host institutions);
- obtained a PhD/doctorate before the tour but no longer than 5 years ago;
- candidates for a PhD/doctorate may also apply if they expect to finalize their work within one year after application, but high standards of quality will be applied in the selection process.

We provide:

- participation in a virtual tour program and arrangement of one-on-one meetings;
- participation in various information sessions and other activities before the virtual tour and as follow-ups;
- financial and organizational support of tailored individual on-site-visits to relevant institutions in Germany.

Funding

For more information on the tour and our host institutions visit our website at daad.de/ainet and check out the [fellows](#) and [report](#) of our first virtual tour.
